

Medium Insulated Medical Carrier - Pathology

Keeps contents cool for 16 hours

PYTB2

The Versapak Medium Insulated Pathology Carrier is used by Pathology departments for storing and carrying specimens and samples within hospitals and medical centres at stable temperatures. It meets the requirements of UN3373 and Packing Instruction P650. Once filled, it is sealed using one of our tamper evident security seals. If the seal is broken, the recipient can see that the integrity of the contents has been compromised.
